Projects

Chocolate Sales Analysis | [Link](#)

May 2025

- Processed raw CSV dataset by cleaning, consolidating, and transforming with Power BI
- Designed star schema model to maximize efficiency and measure the sales of chocolates across countries, categories, and seasons
- Created visualizations depicting key analyses to help with research and business decisions

Titanic Analysis | [Link](#)

December 2024

- Developed regression model to analyze contributing factors of survival rates of 1300 passengers
- Incorporated quantitative and qualitative data to assist with research
- Utilized discovery to further study historical significance of people based on gender, age, and class

Space Invaders | [Link](#)

December 2024

- Created a pixelated game inspired by Space Invaders
- Integrated main game mechanics (e.g., moving, shooting projectiles) with Java and BRIDGES
- Added extra features such as score tracking and enemy movement for smooth gameplay experience

Game of Life | [Link](#)

December 2023

- Implemented custom version of John Conway's Game of Life using MATLAB
- Enabled automatic and manual game mode options
- Added start and stop buttons to manage flow

Experience

Drawing Club – University of St. Thomas | Social Media Manager

August 2024 – Present

- Managed Instagram account for my university's Drawing Club
- Created weekly themed posts to engage the audience using digital tools
- Helped grow the club from 5 to over 130 committed students in two semesters

The Home Depot – Richfield, MN | Customer Service Representative

June 2023 – October 2024

- Collaborated with team to process customer returns and orders through POS and internal database
- Provided technical assistance via phone and in person to an average of 100 customers per day
- Performed troubleshooting for in-store systems and customer tools
