Charlotte Soeurng

Minneapolis, MN | charlottesoeurng@outlook.com | GitHub | Portfolio

Education

University of St. Thomas, St. Paul, MN **September 2022 – May 2026**

- Bachelor of Science in **Computer Science** | Minor in **Data Science**

Coursework: Computer Architecture, Algorithms, Web Development, Information Security, Database Design, Machine Learning and Data Mining

Skills

Languages: Java, JavaScript, Python, SQL

Framework & Libraries: Vue.js, Pandas, NumPy, Node.js

Tools & Concepts: GitHub, Docker, Linux, OpenSSL, Jupyter Notebook, MySQL, Data Structures, REST APIs, Agile

Projects

MN Crime Resource Directory | Minnesota Alliance on Crime **February 2026 – June 2026**

GitHub | Deployment

Front-End Developer, UI/UX Designer, QA

- Owned frontend development and UI/UX design for a nonprofit Minnesota crime resource directory
- Designed and implemented reusable design system with standardized UI, components, and consistent typography
- Developed search and filter among 370 community resources across crime category, county, ZIP code, and keyword
- Built responsive interface with adaptive filter drawers, toggle list/map views, interactive onboarding, column resizers, and location-based map rendering
- Implemented full dark mode theme toggle across all pages using design system and component overrides
- Performed full-stack testing on multiple browsers and devices (Chrome, Firefox, Edge, mobile phones, tablets, etc.) for all implementations
- Validated and cleaned data inconsistencies across over 300 resource listings, including fixing misspellings and correcting broken links

Tech Stack: Vue 3, Vite, Leaflet, Firebase, Shepherd.js, CartoDB, Vercel

Meal Plan Calculator | FoodScale **May 2026 – Present**

Founder, Developer

- Developed web application to calculate exact gram portions of proteins and calories for meal prep, based on available food and macronutrient constraints
- Integrated external API of over 300,000 food items to populate nutritional data based on user requirements
- Designed and built ingredient search functions, unit conversions, and responsive interface to support browsing within integrated database
- Enabled lifters and strict dieters to remove mental math and trial-and-error manual calculations during meal prep sessions, allowing them to get accurate custom plan for each meal within seconds

Tech Stack: Vue 3, Vite, JavaScript, Node.js USDA FoodData Central

Sustainability Challenge Tracker | GreenStep Cities **September 2025 – December 2025**

Internal Tool

Database Developer

- Developed relational database tables for a nonprofit sustainability challenge application, defining column structures, data types, and constraints

Tech Stack: MySQL

Experience

Home Depot, Bloomington, MN | Service Desk **June 2023 – October 2024**
